Pattern
Formation

Results and
Discussion

Simple ODE:

$$d_t u = au - u^3 \quad (1)$$

For $a > 0$ there are 3 solutions

Regime Shifts

Regime shifts
in spatially
extended
eco-systems

Yuval Zelnik

Basics

Front
Dynamics

Pattern
Formation

Results and
Discussion

Classical view of changes in a dynamical system:

Large, abrupt
and reversible
(Catastrophic)

Small and
reversible

Results and
Discussion

Patterned Vegetation

Regime shifts
in spatially
extended
eco-systems

Patterns in dry-land vegetation:
Spots stripes and gaps along the rainfall gradient.

Yuval Zelnik

(Deblauwe et al. 2008)

Basics

Front
Dynamics

Pattern
Formation

Results and
Discussion

Homo-clinic Snaking

Regime shifts
in spatially
extended
eco-systems

Pattern forming system - the Swift-Hohenberg equation

$$\partial_t u = au + bu^2 - u^3 + D\nabla^2 u - \nabla^4 u. \quad (3)$$

Yuval Zelnik

eco-systems

Yuval Zelnik

Basics

Front
Dynamics

Pattern
Formation

Results and
Discussion

Results from the simplified Gilad and Lefever-Lejeune models:

Multiplicity of patterned states

Many localized states

Open Questions

Regime shifts
in spatially
extended
eco-systems

Yuval Zelnik

Basics

Front
Dynamics

Pattern
Formation

Results and
Discussion

- Can bare-soil invade a vegetation state (desertification by front-dynamics)?
- What kind of regime shifts to spatial system undergo?
- Can we see dynamics of vegetation localized states in nature?
