

Session pages

A1. #1

Keren Amit

Experimental investigation of the coupling
between magnetic and superconducting
order parameters in underdoped LSCO thin
films

A1. #2

Golubchik Daniel

Magneto-optical imaging of phase
transitions out of equilibrium

A1. #3

Barnes Doron

Magnetic flux oscillations in partially
irradiated $\text{Bi}_2\text{Sr}_2\text{CaCu}_2\text{O}_{8+x}$ crystals

A1. #4

Leibovitch Guy

Bean-Livingstone barrier enhancement on
nodal surface of the d-wave superconductor
 $\text{YBa}_2\text{Cu}_3\text{O}_{7-x}$

A1. #5

Kraus Kobi

Observing Majorana Zero Modes in a
 P_x+iP_y Superconductor at High
Temperature by Tunneling Spectroscopy

A1. #6

Shwartz Eli

Vortex annihilation effect on ac magnetic
response in type-II superconductors

A1. #7

Dvash Eyal

Dendritic Instability of Magnetic Flux in
Anisotropic Type-II Superconducting Slab.

A1. #8

Meidan Dganit

Superconductor insulator transition in thin
films driven by an orbital parallel magnetic
field effect

A1. #9

Ovadia Maoz

The superconductor-insulator transition: is there a new insulating state?

A1. #10

Zaberchik Moran

Properties of superconducting TiSe_2Cu_x

A2. #1

Ilani Shahal

Coupling of Spin and Orbital Motion of
Electrons in Ultra-Clean Carbon Nanotubes

A2. #2

Bid Aweek

Fabry-Perot interferometer in the Quantum
Hall regime

A2. #3

Levy Shai

Electric properties of a MOS structure
containing nano-crystalline Ge imbedded
into a thick SiO₂ film

A2. #4

Machluf Shimon

A novel atom trap based on a carbon
nano-tube

A2. #5

Stotland Alexander

Semilinear response for the heating rate of
cold atoms in vibrating traps

A2. #6

Steiner Dov

Electronic level structure of semiconductor nanocrystals in 2D arrays and in core/shell heterostructures

A2. #7

Lewkowicz Meir

Dynamics of the particle-hole pair creation
in suspended graphene

A2. #8

Freilikher Valentin

Transport and localization in periodic and
disordered graphene superlattices

A2. #9

Shafir Oren

Electromagnetic radiation emanating from
the molecular nanomagnet Fe₈

A3. #1

Diamant Haim

Critical swelling of fluctuating capsules

A3. #2

Frydel Dariusz

Short time Dynamics in
Quasi-One-Dimensional (Q1D) Colloidal
Suspension

A3. #3

Shlomovitz Roie

Curved inclusions surf membrane waves.

A3. #4

Lindner Moshe

Novel 3D Tethered Particle Motion (TPM)

A3. #5

Granek Rony

Active Transport on Disordered
Microtubule Networks: The Generalized
Random Velocity Model

A3. #6

Nir Guy

Studying the interactions of a single enzyme
and DNA using tethered particle motion
method (TPM)

A3. #7

Naoz Moshe

A physical model of cellular "feet"

A3. #8

Rappaport Shay. M

Model of DNA Bending by Cooperative
Binding of Proteins

A4. #1

Taitelbaum Haim

Reactive-Wetting in Room Temperature:
Bulk Spreading and Interface Kinetic
Roughening

A4. #2

Rotman Ziv

Slow dynamics and glassiness in a lattice
model

A4. #3

Gupta Shamik

Dynamics of fluctuations in driven diffusive
systems: Finite-size effects

A4. #4

Veksler Alexander

Generalized fractional Fokker-Planck
equation for anomalous diffusion

A4. #5

Roichman Yael

Crossover from sub-diffusion to
super-diffusion in a tilted washboard
potential

A4. #6

Maruvka Yosef

Polymorphism data may reveal the origin of species abundance statistics. Is it natural selection? or genetic drift?

A4. #7

Yaari Gur

In Random Multiplicative Environments –
Charity Pays Off.

A4. #8

Kenett Dror

The stock market as a complex adaptive system - the functional role of the index

A5. #1

Doucot Benoit

Physical implementation of protected qubits

A5. #2

Aviv Gal

Bloch Qbit Multiphoton Coherent
Manipulations of an Atomic Two-State
System

A5. #3

Shahmoon Ephraim

Qubit Coherent Control with Squeezed
Light Fields

A5. #4

Panich Alexander

^{73}Ge nuclear spin decoherence and
germanium-based quantum computer

A5. #5

Amusia Miron

Interference resonances in endohedral atoms

A5. #6

Kot Eran

Coherent Scattering of a Single Atom by
Localized BEC in Optical Lattice

A5. #7

Chuchem Maya

Dynamics of condensed Bose particles in a
driven few site system, and the many body
Landau-Zener transition

A5. #8

Etzioni Yoav

Particle Dynamics on a Ring Affected by
Noisy Environments

A5. #9

Waxman Amir

Modulation Enhancement of a Laser Diode in an External Cavity

A6. #1

Cohen Oren

Optically-induced quasi-phase-matching in
high-harmonic generation

A6. #2

Natan Adi

Strong field photodissociation control of
 H_2^+ with chirped laser pulses

A6. #3

Golan Amir

Raman Spectral Signatures as Conformational Probes of Biomolecules

A6. #4

Kapilevich Boris

THz Characterization of Lossy Materials
Using Multi-Layers Measuring Cell

A6. #5

Pugatch Rami

Universal Spectra of Coherent Random
Recurrence

A6. #6

Fridman Moti

Fiber Lasers with Increase Output
Brightness

A6. #7

Grinvald Eran

Photonic crystal approach to guided mode
resonance

A6. #8

Gersten Alexander

The mystery of the connection between the
photon wave function and Maxwell's
equations

A7. #1

Stelle Kelly

Is $N=8$ Supergravity Finite?

A7. #2

Brandhuber Andreas

Hidden structures in gauge theory and
gravity

A7. #3

Bringoltz Barak

Lattice explorations of QCD
flux-tubes/strings, and their large-N limit

A8. #1

Nakar Ehud

Studying gamma-ray bursts with the Fermi
observatory

A8. #2

Katz Boaz

The energy production rate & the generation
spectrum of UHECRs

A8. #3

Naoz Smadar

Detecting the first generation of galaxies
through their 21-cm signature

A8. #4

Woo Joanna

Environment and Star Formation

A8. #5

Perets Hagai

On the triple origin of blue stragglers

A8. #6

Polishook David

Spin Rate Distribution of Small-Sized Main
Belt Asteroids

A8. #7

Lemze Doron

Are large bound objects easy to study? - not
for sure!

A8. #8

Zinger Elad

The Role of Gas Streams in the Formation
and Structure of Galaxy Clusters

A9. #1

Rubinstein Shmuel M.

Triggering and control of stick-slip friction

A9. #2

Efrati Efi

Elastic theory of unconstrained
non-Euclidean plates and shells

A9. #3

Kletter Assaf

Periodic and scale-free patterns: reconciling
the dichotomy of dryland vegetation

A9. #4

Yochelis Arik

Selection of periodic and localized states in
Reaction-Diffusion-Advection systems

A9. #5

Kenig Eyal

Pattern selection in parametrically-driven
arrays of nonlinear resonators

A9. #6

Yaakobi Oded

Multidimensional, autoresonant three-wave
interactions

A9. #7

Nathan Jonathan

Modeling community-level properties of
vegetation in a water limited system.

B1. #1

Lindner Netanel

Vortex quantum dynamics of two
dimensional lattice bosons

B1. #2

Bary-Soroker Hamutal

Effect of Pair Breaking on Mesoscopic
Persistent Currents Well above the
Superconducting Transition Temperature

B1. #3

Erez Amir

How to determine T_c for disordered
superconducting films

B1. #4

Goren Lilach

Enhancement of the superconducting
transition temperature in cuprate
heterostructures

B1. #5

Michaeli Karen

Fluctuations of the superconducting order parameter as an origin of the Nernst effect

B1. #6

Diamant Itay

Are cuprates BCS superconductors?

B1. #7

Almog Boaz

Observation of Andreev Saint-James
reflections in nano-scale planar
superconductor To ferromagnet contacts

B1. #8

Lindenfeld Ze'ev

Pairing interaction in ultra-small
nano-particles

B2. #1

Sonin Edouard

Gauge-field rotation of electrically
polarized Bose condensate due to
Aharonov-Bohm effect

B2. #2

Puller Vadim

Breaking of Phase Symmetry in
Non-Equilibrium Aharonov-Bohm
Oscillations through a Quantum Dot

B2. #3

Goldstein Moshe

Interacting resonant level side-coupled to a
Luttinger liquid: Duality to resonant
tunneling

B2. #4

Goberman Dotan

Shot noise and noise power spectrum for
tunneling through a quantum dot in the
Kondo regime

B2. #5

Rothstein Eitan

The noise spectra of a biased quantum dot

B2. #6

Ringel Zohar

Delayed currents and interaction effects in
mesoscopic capacitors.

B2. #7

Bitton Liora

Controllable Metallic Quantum Dot

B2. #8

Moshe Ofer

Perturbing GaN/AlN quantum dots with
uniaxial stressors

B2. #9

Sela Itamar

Quantum Stirring of electrons in low
dimensional devices

B3. #1

Bar-Ziv Roy

Towards Synthetic Gene Systems on a Chip

B3. #2

Garini Yuval

Spatial and temporal organization of
telomeres in the nucleus

B3. #3

Altman Liat

Studying single gene transcription by
autocorrelation analysis

B3. #4

Feingold Mario

Cell Shape Dynamics with Sub-pixel
Accuracy

B3. #5

Friedlander Tamar

Adaptive response from state-dependent
inactivation

B3. #6

Labin Moshe

Vision effects caused by glial cells in the
retina

B3. #7

Ankri Rinat

Estimation of the Optimal Wavelengths for
Low-Level-Laser Therapy in Skin Tissue

B3. #8

Doron Itai

Mapping and assessment of epileptogenic
foci using frequency-entropy templates

B4. #1

Ben-Abraham Shelomo I

Crystals and beyond

B4. #2

Amir Ariel

Diffusion of a quantum particle in a
time-correlated noisy environment

B4. #3

Assaf Michael

Spectral theory and WKB approximation
for population quasi-stationarity and
extinction

B4. #4

Efraim Hadar

Dual-Transceiver Quantization Can
Improve Error Performance in CDMA

B5. #1

Seri Snir

Transport properties of Ar⁺ irradiated
SrTiO₃

B5. #2

Wachtel Gideon

Inhomogeneous phases in a
double-exchange magnet with long range
Coulomb interactions

B5. #3

Naftalis Netanel

Anisotropic magnetoresistance and planar
Hall effect in Manganites: The role of
crystal symmetry effects

B5. #4

Golosov Denis

Two-fluid behaviour at the origin of the resistivity peak in doped manganites

B5. #5

Kanzieper Eugene

Integrable theory of quantum transport in
chaotic cavities

B5. #6

Strelniker Yakov

Manipulating the optical transparency of meta-materials with a strong magnetic field

B5. #7

Shperber Yishai

Field induced resistivity anisotropy in
 SrRuO_3 films

B5. #8

Levy Roi

Quantum Hall Insulator

B5. #9

Ben Shalom Moshe

Anomalous magneto-transport properties of
a two dimensional electron gas formed at
the interface between the insulators SrTiO_3
and LaAlO_3

B5. #10

Rosenblatt Daniel Pablo

Extraordinary Hall effect in thin Co-Pd
multilayers

B6. #1

Fruchtman Amnon

The blue mode in Helicon plasma

B6. #2

Alumot Dror

Determination of the spatial distribution of
the properties and size of plasma at
stagnation

B6. #3

Dyunin Egor

A new THz FEL Development Project

B6. #4

Pinhasi Yosef

Space-frequency model for pulsed beam
free-electron laser operating in the
space-charge (collective) dominated regime

B6. #5

Barth Ido

A water bag model of driven phase space
holes in non-neutral plasmas

B6. #6

Sarid Eli

Antihydrogen formation and trapping

B6. #7

Yahalom Asher

Non-Stationary Barotropic
Magnetohydrodynamics as a Four Function
Field Theory

B7. #1

Yigal Shamir

Lattice gauge theory meets technicolor

B7. #2

Vivek Kumar

Evolution of Nuclear Shape in the Light Radon Isotopes

B7. #3

Ben-Dayan Ido

Phenomenological Consequences of Modular Inflation

B7. #4

Blum Kfir

Beyond MSSM Baryogenesis

B7. #5

Sadeh Iftach

Luminosity Measurement at the International Linear Collider

B7. #6

Boaz Karni

Crystal Structure in High Dimensions

B7. #7

Hochberg Yonit

Splitting the Wino Multiplet by
Higher-Dimensional Operators in Anomaly
Mediation

B7. #8

Stern Amir

Measurement of the energy dependence of
the total photon-proton cross-section at
HERA

B7. #9

Stern Merav

Corrected Charged Black Strings

B8. #1

Shporer Avi

Searching For and Studying Transiting
Extrasolar Planets

B8. #2

Myers Zacharia

Neutrino Signatures of Dark Matter
Annihilation in the Galactic Disc

B8. #3

Shaham Alon

Rotational Properties of the Maria Asteroid Family

B8. #4

Ofir Aviv

An Algorithm For The Detection Of Transiting Circumbinary Planets
