

List of publications

- [1] D. Cohen and S. Fishman, *Quantum Dissipation for the Kicked Particle*, Phys. Rev. A **39**, 6478-6490 (1989).
- [2] D. Cohen, *Localization Dynamical Correlations and the Effect of Colored Noise on Coherence*, Phys. Rev. Lett. **67**, 1945-1948 (1991).
- [3] D. Cohen, *Destruction of Coherence Due to Coupling to a Bath in the Kicked Rotator Problem*, Phys. Rev. A **43**, 639-645 (1991).
- [4] D. Cohen, *Quantum Chaos Dynamical Correlations and the Effect of Noise on Localization*, Phys. Rev. A **44**, 2292-2313 (1991).
- [5] D. Cohen, *Noise Dissipation and the Classical Limit in the Quantum Kicked Rotator Problem*, J. Phys. A **27**, 4805-4829 (1994).
- [6] I. Szafranek, Z. Calahorra, O. Amir, A. Adin and D. Cohen, *Blooming Effects in Indium Antimonide Focal Plane Arrays*, SPIE Proceedings Vol. 3061, 633-639 (1997).
- [7] D. Cohen, *Unified Model for the Study of Diffusion Localization and Dissipation*, Phys. Rev. E **55**, 1422-1441 (1997).
- [8] D. Cohen, *Quantum Dissipation versus Classical Dissipation for Generalized Brownian Motion*, Phys. Rev. Lett. **78**, 2878 (1997).
- [9] D. Cohen, *Periodic Orbits, Breake-time and Localization*, J. Phys. A **31**, 277-287 (1998).
- [10] D. Cohen, H. Primack and U. Smilansky, *Quantal-Classical Duality and the Semiclassical Trace Formula*, Ann. Phys. **264**, 108-170 (1998).
- [11] D. Cohen, *Quantal Brownian Motion - Dephasing and Dissipation*, J. Phys. A **31**, 8199-8220 (1998).
- [12] D. Cohen and Y. Imry, *Dephasing at Low Temperatures*, Phys. Rev. B **59**, 11143-11146 (1999).
- [13] D. Cohen, *Quantum Dissipation due to the interaction with chaotic degrees-of-freedom and the correspondence principle*, Phys. Rev. Lett. **82**, 4951 (1999).

- [14] D. Cohen, *Chaos and Energy Spreading for Time-Dependent Hamiltonians, and the various Regimes in the Theory of Quantum Dissipation*, Annals of Physics **283**, 175-231 (2000).
- [15] D. Cohen, F.M. Izrailev and T. Kottos, *Wavepacket dynamics in energy space, RMT and Quantum-Classical correspondence*, Phys. Rev. Lett. **84**, 2052 (2000).
- [16] D. Cohen and E.J. Heller, *Unification of perturbation theory, RMT and semiclassical considerations in the study of parametrically-dependent eigenstates*, Phys. Rev. Lett. **84**, 2841 (2000).
- [17] A. Barnett, D. Cohen and E.J. Heller, *Deformations and dilations of chaotic billiards, rate of dissipation, and quasi-orthogonality of the boundary wavefunctions*, Phys. Rev. Lett. **85**, 1412 (2000).
- [18] D. Cohen and T. Kottos, *Quantum-mechanical non-perturbative response, and the limitations of linear-response theory*, Phys. Rev. Lett. **85**, 4839 (2000).
- [19] D. Cohen, A. Barnett and E.J. Heller, *Parametric Evolution for a Deformed Cavity*, Phys. Rev. E **63**, 46207 (2001).
- [20] D. Cohen, *Chaos, Dissipation and Quantal Brownian Motion*, Proceedings of the International School of Physics *Enrico Fermi* Course CXLIII *New Directions in Quantum Chaos*, Edited by G. Casati, I. Guarneri and U. Smilansky, IOS Press, Amsterdam (2000).
- [21] D. Cohen and T. Kottos, *Parametric dependent Hamiltonians, wavefunctions, random-matrix-theory, and quantal-classical correspondence*, Phys. Rev. E **63**, 36203 (2001).
- [22] A. Barnett, D. Cohen and E.J. Heller, *Rate of energy absorption for a driven chaotic cavity*, J. Phys. A **34**, 413-437 (2001).
- [23] T. Kottos and D. Cohen, *Failure of random matrix theory to correctly describe quantum dynamics*, Phys. Rev. E **64**, 065202(R) (2001).
- [24] D. Cohen, *Dephasing due to the interaction with chaotic degrees of freedom*, Phys. Rev. E **65**, 026218 (2002).

- [25] D.A. Wisniacki and D. Cohen, *Quantum irreversibility, perturbation independent decay, and the parametric theory of the local density of states*, Phys. Rev. **E 66**, 046209 (2002).
- [26] D. Cohen, *Driven chaotic mesoscopic systems, dissipation and decoherence*, lecture notes of course in the 2002 Karpacz school, in *Dynamics of Dissipation*, Proceedings of the 38th Karpacz Winter School of Theoretical Physics, Edited by P. Garbaczewski and R. Olkiewicz (Springer, 2002).
